

```
std::integral_constant  
< std::uintmax_t, (static  
_cast< std::uintmax_t >  
(ValueResults::value)+...) >
```

```
utils::meta::sum< ValueResults >
```

A blue arrow points from the function call in the right box to the return type in the left box, indicating that the function's return type is deduced from the argument's type.
