

```
utils::function_decay  
< std::remove_pointer  
_t< std::remove_cvref  
_t< T > > >
```

```
utils::function_decay< T >
```

A diagram showing a central template specialization box on the right with two blue arrows pointing to two more boxes on the left. The top box contains a complex nested template specialization, and the bottom box contains a simpler specialization using decltype and operator().

```
utils::function_decay  
< decltype(&T::operator())>
```
