

```
utils::function_decay  
< std::remove_pointer  
_t< std::remove_cvref  
_t< T > > >
```

```
utils::function_decay< T >
```

The diagram consists of three rectangular boxes. A central gray box on the right contains the text 'utils::function_decay< T >'. Two blue arrows originate from this central box. One arrow points diagonally up and to the left towards a white box containing a complex template specialization: 'utils::function_decay< std::remove_pointer_t< std::remove_cvref_t< T > > >'. The other arrow points diagonally down and to the left towards another white box containing a simpler specialization: 'utils::function_decay< decltype(&T::operator())>'. The boxes have thin black borders.

```
utils::function_decay  
< decltype(&T::operator())>
```
