

```
std::integral_constant  
< std::size_t, PredTrait  
< at_t< Tuple, Begin >,  
  T >::value ? Begin :search  
< Tuple, T, PredTrait, Begin  
  +1, End >::value >
```

```
utils::meta::search  
< Tuple, T, PredTrait,  
  End, End >
```

A blue arrow points from the `search` function to the first `std::integral_constant` box, indicating a recursive call.

```
std::integral_constant  
< std::size_t, actual  
_index_v< Tuple, End > >
```

A blue arrow points from the `search` function to the second `std::integral_constant` box, indicating a recursive call.
