

implements < shape,
rectangular >

square

The diagram consists of two rectangular boxes. The top box is white with a thin gray border and contains the text 'implements < shape, rectangular >'. The bottom box is gray with a black border and contains the text 'square'. Two dark blue curved arrows originate from the top edge of the 'square' box and point upwards towards the bottom edge of the 'implements' box, indicating that the 'square' class implements the 'shape' and 'rectangular' interfaces.
