

utils::default_binary
_op_traits

```
graph BT; A["utils::shift_behavior<br>::default_binary_op_traits"] --> B["utils::default_binary_op_traits"]
```

The diagram illustrates a relationship between two C++ classes. At the bottom is a gray-shaded box representing a base class, `utils::shift_behavior`, which contains a static member `::default_binary_op_traits`. A blue arrow points upwards from this box to a white box above it, representing a derived class. The derived class contains the static member `utils::default_binary_op_traits`, indicating that it inherits this member from the base class.
